

OUR MISSION: Dedicated to advancing the neurological health of our community

OUR VISION: We commit to being one of the top 10 neurology departments in the US; to providing the highest quality and innovative care for neurology patients in Southern Florida and beyond; to being at the forefront of research of common neurological disorders; and to being among the best training programs for future clinical and academic neurologists.

Our Commitments

Leadership Depth	Professional Excellence	Accessibility	Efficiency	Integration of Faculties
Strength, depth and breadth of leadership is a driver of excellence in all areas of the department of neurology.	Professional excellence drives our recruitment and retention, and is the bedrock of our multiple missions of clinical care, research, education and administration.	Easy access to our services by patients; teachers who are available to learners; and open collaboration with our fellow colleagues is a hallmark of the department.	Efficient operations that support the patient experience, ensure the success of the faculty, and optimize the experience of our trainees is a commitment.	We are dedicated to the integration of faculties within the department and across department lines to expand knowledge and enhance care.

Our Pledge

<p><u>Clinical</u></p> <p>We are committed to providing patients with easy access to excellent care; to physicians and staff who work in a responsive and supportive environment and are adequately recognized for their efforts; and to maintaining a clinical enterprise that will enhance our institutional reputation and profile while remaining competitive and viable.</p>	<p><u>Research</u></p> <p>We are committed to enhancing research, producing health innovations and translational discoveries that advance the neurological health of our patients and community.</p> <p>To our stakeholders – the University of Miami, NIH and other funding sources, our colleagues, our trainees, and ultimately our patients and community – we pledge to provide the highest quality research, training environment, new treatments, and discoveries in the neurological sciences to enhance quality of life and successful aging .</p>	<p><u>Education</u></p> <p>We are committed to a program of the highest quality whose main goal is to attract and retain superior quality applicants.</p> <p>To our fellows, residents and medical students, and ultimately to the patients, we pledge in our training to support excellence in patient care; the highest quality training based on best practices in curriculum and teaching; and we pledge to listen to our students, be open to and to act upon constructive suggestions.</p>
<p><u>Administration</u></p> <p>We are committed to attracting and retaining the most qualified employees and faculty in all functions and areas of the department; to leadership that is honest, open and respectful; to an organizational structure that responds with speed and agility; to a culture of appreciation, recognition and ownership; to informed, well trained, supportive staff who have access to guidelines and resources; to reward structures that recognize and incentivize the best employees; to thorough, accurate, transparent and timely reporting; and to the dissemination of information to internal as well as external stakeholders.</p>
